Regional Operations Center
Salt Lake City, UT*

WEATHER KEY POINTS

12/06/21 - 12/12/21

Monday-Sunday

- Areas of dense fog will continue Monday morning across central and northern valleys.
- Gusty onshore winds are expected across southern California on Monday and Tuesday, especially over the mountains and deserts.
- A period of rainfall and high mountain snow is expected across primarily the higher terrain of northern California on Monday, including the Sierras
 - Precipitation is generally expected to be light to locally moderate, and there are no significant flooding concerns at this time
- Additional precipitation with areas of gusty winds are possible across the state for late Wednesday and Thursday
 - Snow may impact high elevation travel, mainly above 4000 ft
- Another storm system may bring rain and mountain snow and gusty winds to northern and central California this weekend. Locally heavy rain and mountain snow is possible, but details in timing and location are still to be determined.
